

## 2011 Voice Broadcasting Overview and Pricing

Blast Companies' voice broadcasting is a web-based tool that allows clients to record a personal voice message and simultaneously send it to hundreds, even thousands, of recipients fast. Our voice broadcasting application is capable of delivering 200,000 30-second messages per hour; which equates to 3,334 messages per minute, or 56 messages per second. This includes all setup and disconnect time from the telephone companies.

Blast Companies will provide the following elements for your voice broadcasting success:

- Dedicated resources
- Best practices – knowledge-based assistance
- Quick start – functioning in a matter of hours, incredible ROI
